

## WORK EXPERIENCE

**2019 - 2021 Post-doc fellowship**

University of Perugia

Project title "Lipidomics and personalized medicine".

The research is about untargeted approach to different pathological conditions in order to obtain new data on targets and biomarkers for a clinical relevance of lipidomics.

Academic

**2018-2019 Post-doc fellowship**

University of Perugia

Project title "Lipidomic profiles of breast cancer: an unexplored way for personalized treatment".

The research activity was carried out in the mass spectrometry laboratory of Prof. Cruciani. Various breast cancer cell lines, provided by the Mario Negri Research Institute, were analyzed in order to obtain their lipid profile in relation to various treatments carried out and / or to their resistance to some drugs, with the aim of identifying target cells for the development of methods to combat the disease.

Academic

**2016- 2018 Post-doc fellowship**

University of Perugia

Research activity for a post-doc Project: "DEVELOPMENT OF ANALYTICAL PROCEDURES FOR LIPIDOMICS".

Study of the lipid fingerprint of human serum in order to investigate potential biomarkers for stroke,  
Serum analysis for evaluation of natural therapies concerning fatty liver

Serum analysis for the study of ovarian cancer biomarkers

Autophagy induced nervous cell analysis,

Analysis of liver cells for drug metabolism,

Analysis of nervous cells induced to differentiate towards the dopaminergic model,

Analysis of nervous cells for the study of biomarkers for Parkinson's,

Analysis of human sebum samples for reference models

Analysis for bladder cancer biomarkers

Analysis for assessing the impact of environmental pollution

Academic

**2013 – 2015      Postgraduate research scholarship**

Regione Umbria

Project entitled

"CORRELATION BETWEEN BLOOD LIPID FOOTPRINT AND INCIDENCE OF NEURODEGENERATIVE DISEASES. DEVELOPMENT OF A NON-INVASIVE AND CHEAP METHOD TO REDUCE THE COSTS OF REGIONAL PUBLIC HEALTH".

Development of lipid extraction protocols from human serum, validation of chemical-analytical methods for lipidomics, use of LC / MS QTOF instrumentation, use of LCMS analysis management software and software for lipidomics analysis and statistical analysis.

**2010      Post-graduate research scholarship**

University of Perugia

Project entitled "Evaluation of the ecotoxicological aspects of the freshwater macrobenthic invertebrates and their use as bioindicators" at the Dept. of Animal Biology and Ecology, University of Perugia

Academic

**2008– 2009      Post-doc fellowship**

University of Perugia

Project on the malformations of aquatic insect larvae as bioindicators of the environmental status of water bodies. Chemical and physico-chemical analyzes on waters and sediments. Preparation and analysis of biological material, observation and analysis. Drafting of protocols concerning the use of the parameter of morphological alterations as a bioindicator of environmental quality. Sampling of water bodies under investigation. Tools used: optical microscope, atomic absorption in flame, GC / MS.

Academic

**2008-2009      Laboratory technician**

Regione Umbria research scholarship

SEIT s.r.l.

Chemical and chemical-physical analyzes on environmental matrices, organization and drafting of the final reports.

Sector of waste disposal and waste water of agricultural and livestock origin, land reclamation, safety in the workplace by controlling dust and chemical pollutants. Process control and environmental monitoring on waste treatment plants and landfills. The activities carried out during this period consist in: digestion of samples for the analysis of metals, determination of anions (fluorides, chlorides, nitrates, phosphates, sulphates), COD, TOC, BOD5, total nitrogen, ammonia nitrogen, phosphorus, phenols , humic and fulvic acids, hydrocarbons ( $C < 12$ ,  $C > 12$ ), cyanides, determination of total solids, total volatile solids, suspended solids, volatile suspended solids. The most used instruments were: ion chromatograph (anionic and cationic), ICP OEM (optical plasma for heavy metals), TOC (organic carbon analyzer).

## 2004-2007 Research activity for the PhD in Biology and Ecology

University of Perugia

During the PhD course:

Member of the working group for the drafting of the Management Plans of Natura 2000 sites in Umbria (applications of European Directives for protected species, SCI and SPA). Specific application of the Guidelines, verification of the absence of target species in the sites identified as priorities, analysis of the state of the populations, drafting of guidelines for the protection and safeguarding of the same.

Member of the working group within the agreement between the Department of Animal Biology and Ecology of the University of Perugia and the Ministry of Education, University and Research (MIUR) for the research project entitled "Alternate guests of parasites of freshwater fish fauna: natural environments and farms ". In the two years of activity, parasites belonging to the phylum Myxozoa have been identified in some oligochetes found in different biotopes of the Umbrian Valnerina area.

Teaching support for Lessons as part of the exercises of the Ecology II course for students of the Master's Degree in Biology and Environment (class 6 / S)

## EDUCATION AND TRAINING

18/05/2012 **Degree in Environmental Chemistry - (110/110 cum laude)**

2004/2007 **PhD in Biology and Ecology (achieved on 27/02/2008)**

Thesis Title: Le malformazioni dei Chironomidi (Dipetra) come bioindicatori delle acque interne. Sampling in inland water environments. Biological analyzes on insect larvae. Chemical analysis (heavy metals with atomic absorption spectrophotometer and pesticides with gas mass) of water and sediments. Experimental induction with heavy metals and pesticides of malformations in the laboratory according to the protocol OECD 218 GUIDELINES FOR THE TESTING OF CHEMICALS. Statistical analysis and data processing.

As part of the research project relating to the PhD he spent a period at the University of Amsterdam, Department of Ecology and Ecotoxicology, with which he collaborated for experimental induction studies of malformations for the validation of a new laboratory protocol.

16/07/2004 **Degree in Natural Sciences - (110/110 cum laude)**

## PERSONAL SKILLS

Mother tongue(s) Italian

Other language(s)	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	C2	C2	C2	C2	C2

Levels: A1/A2: Basic user - B1/B2: Independent user - C1/C2 Proficient user  
Common European Framework of Reference for Languages

Communication skills • good communication skills gained through my professional experiences

Organisational / managerial skills	Ability to work in a team acquired over the years as a member of research groups. Autonomous ability to organize work, even in stressful situations and according to deadlines, defining priorities for achieving the set objectives. Coordination capacity of working groups.
Job-related skills	Use of the main laboratory tools for chemical and biological analysis.
Other skills	I practiced competitive artistic gymnastics (national) and competitive horse riding (national).
Driving licence	B

#### ADDITIONAL INFORMATION
