

Curriculum Vitae of Andrea Onofri

March 31, 2016

PERSONAL DATA

- Full name: Andrea Onofri, PhD
- Nationality: Italian
- Date of Birth: 22 March 1962
- Place of birth: Perugia (ITALY)
- Address: Department of Agroenvironmental and Crop Sciences University of Perugia
B.Go XX Giugno, 74 - 06121 Perugia (Italy)
Tel.:+39 - 075 - 5856324 (direct line)
Fax: +39 - 075 - 5856344
- ORCID: 0000-0002-6603-329X
ResearcherID: D-1029-2016
Scopus Author ID: 8924956500

EDUCATION

- 1994: PhD in "Crop Productivity" at the University of Perugia. Thesis: "Empirical regression models for advisory purposes in weed science", supervisor: Prof. Gino Covarelli.
- 1987: Degree in Agricultural Science, University of Perugia (Italy). Final mark 110/110 cum laude. Thesis (translation of the original Italian title): "Soil organic matter evolution after amendment with urban waste", Institute of Agricultural Chemistry, supervisor Prof. P.L. Giusquiani.

WORK POSITIONS

- 2015 to date: Associate Professor at the Department of Agricultural, Food and Environmental Sciences, University of Perugia.
- 1997 to 2015: Researcher at the Department of Agroenvironmental and Crop Sciences, University of Perugia.
- 1990 -1997: PhD student and/or research assistant at the Institute of General Agronomy and Crop Science, University of Perugia.
- 1988-1989: Technical assistant for CIBA-GEIGY S.p.A., with sales responsibility for two Italian districts (Grosseto and Livorno).

RESEARCH ACTIVITIES

Subject

Experimental methodology in agriculture. Weed-Crop Relationships. Weed control methods. Ecotoxicological evaluation of herbicides. Genotype by environment interactions. Agricultural system modelling.

Research projects

1. 2015 - 2016: Research Project: "Effect of salinity on the production of phytochemicals and on seed germination for several crop species", founded by the University of Perugia.
2. 2013 - 2015: Project PRIN IC-FAR: "Linking Long Term Observatories with Crop Systems Modeling For a better understanding of Climate Change Impact, and Adaptation Strategies for Italian Cropping Systems".
3. 2011 - 2014: Project Cassa di Risparmio "Enriching horticultural crops in selenium: possibilities and effects on yield quality and pollen viability".
4. 2006-2009: Project "Innovations about proteins of vegetal origin: comparison among lucerne genotypes", founded by Regione Emilia Romagna.

5. 2005-2008: Agreement between the Agricultural Faculty and Regione Umbria "Genic flow and its potential effects on seed production. Co-existence between genetically modified crops and conventional crops in conventional and organic farming systems".
6. 2005-2008: Project IMBOL. "Organic farming - milk and ovine cheese: exploratory analysis about the impact of organic farming on milk ovine husbandry".
7. 2001-2004: Finalised Project TISEN. Research title: "Innovative and sustainable techniques to produce and transform non-food crops".
8. 1998-2001: Project P.N.R.A. (Italian Ministry for Agriculture) "Rationalisation of herbicide usage, optimisation of technology for cropping systems, integration of old and new technologies and use of natural products to lower the impact on the environment and human health of agricultural activities".
9. 1998-2001: Project P.N.R.A. (Italian Ministry for Agriculture) "Rationalisation of herbicide usage, optimisation of technology for cropping systems, integration of old and new technologies and use of natural products to lower the impact on the environment and human health of agricultural activities".
10. 1998-2000: Research Project (University of Perugia) on "Chiral compounds in plant protection: biological activity and soil persistence of imazamox".
11. 1996-1999: Research Project UE - TAB-RES-INFO 94/T/12.1 on "Optimal Cultural Practices for Flue-Cured Tobacco Varieties with early Maturity and low Nicotine and TAR Potential".
12. 1995-1998: Research Project (Italian Ministry for University and Scientific Research) on "Biology and ecophysiology of Xanthium strumarium and Lactuca serriola".
13. 1994-1995: Research contracts to perform some studies on "Biological activity of triflusulfuron-methyl on soil and plant", "Determination of residual phytotoxicity to following crops by some sulphonylurea herbicides" and "Safe recropping intervals on soils sprayed with sulphonylurea and imidazolinone herbicides".

14. 1994-1995: Research Project (Italian Ministry for University and Scientific Research) on "Joint action of rimsulfuron and metribuzin against Solanum nigrum in tomato".
15. 1993-1997: Finalised Project PANDA (Italian Ministry for Agriculture and Fisheries). "Rationalisation of weed control by using surfactants" and "Weed management on set-aside land".
16. 1993-1994: Research Project (Italian Ministry for University and Scientific Research) on "Varietal sensitivity to the most common herbicides in winter wheat".
17. 1993: Training period at the Federal Biological Research Centre, Braunschweig (Germany). During this time the topic of work was "Bioassay with higher plants to study biological activity and availability to plants of some sulphonilurea and imidazolinone herbicides (imazethapyr, primisulfuron and rimsulfuron)".
18. 1992-1993: EWRS-MSA Joint Experimentation Programme on "Modelling interactions between Sinapis alba and sugar beet".
19. 1992-1994: Research project (Italian Ministry for Agriculture) on "Use of surfactant to reduce the application rate for some selected herbicides in winter and summer crops".
20. 1991-1993: Research Project RAISA (National Council of Research) on "Influence of agronomic practices on soil persistence and mobility for some selected herbicides".
21. 1991-1994: PhD COURSE Project on "Empirical regression models for advisory purposes in weed science".

TEACHING ACTIVITIES

Main teaching activities

Starting from the Academic Year 2001-2002, Andrea Onofri has taught several courses in First Level and Second Level degree programmes, mainly on the following subjects: "Agronomy and Crop Sciences", "Forage system management", "Experimental Methodology in Agriculture" and "Statistics". He has also served as a tutor of several students during their first and second degree thesis development. In this latter Academic Year (2016 - 2017), Andrea Onofri has taught the following courses:

- "Agronomy and forage systems, module of Agronomy", first level degree in "Animal Production", Faculty of Veterinary Medicine, University of Perugia (6 ECTS)
- "Agronomy and forage systems, module of Forage Systems", first level degree in "Animal Production", Faculty of Veterinary Medicine, University of Perugia (6 ECTS)
- "Experimental design and modelling in agriculture", second level degree in "Sustainable Agriculture", Faculty of Agriculture, University of Perugia (6 ECTS)

Other relevant teaching activities

1. "Fondamenti di metodologia per la sperimentazione biologica" and "Metodologie statistiche avanzate per la sperimentazione biologica", Cycles of lectures for PhD students (June - October, 2016).
2. "Repeated experiments: mixed models and multiple comparison testing. Seminars for PhD students at the University of Reggio Calabria, 6 and 7 June 2012.
3. *Statistical analyses of seed germination assays: survival regression models.* Seminar for PhD students at the University of Perugia, 24 January 2012.
4. (1): *Nonlinear models: applications and case studies;* (2) *Extending linear models: generalised linear models.* Cycle of two seminars for PhD students at the University of Catania, 14-15 October 2009.
5. *Linear models on biological experiments.* Seminars at the course "Analysis of Biological Assays in Agriculture", Nova University, Riga (Latvia), 11-17 August 2007.
6. *Introduction to linear modelling in biological research. Introduction principal component analysis.* Cycle of two seminars for PhD students at the University of Catania, 5-6 July 2007.
7. *Linear models on biological experiments: ANOVA and regression* Seminars for PhD students at the University of Catania, 9-10 October 2006.
8. *Applied statistics for seed research experiments.* Seminars at the 1st Course "Produzione e tecnologia delle sementi", organised by the Italian Society of Agronomy, Perugia, 15 June 2006.

9. *Methodological approach for pesticide research.* Seminar at the 3rd Course for 'Inspectors for the control of official biological assay centres', 22 June 2005.
10. *Methodological approach for studies about xenobiotics in plant protection.* Cycle of two seminars for the PhD students in "Crop productivity", University of Padua, 15 and 16 October 1997.

OTHER RELEVANT INFORMATION

Meeting organisation

Andrea Onofri has been member of the organising committee of the following Symposia:

- XXX Convegno I.S.H.S., Perugia, June 2004
- XXX Meeting S.I.A., Perugia, June 1996.
- "5th EWRS Symposium on weed problems in the Mediterranean Area", Perugia, dal 6-8 June 1994.

Editorial activities

In the last year Andrea Onofri has served as the referee for several International Journals and publishing companies, such as Weed Research, Journal of Environmental Quality, Springer-Verlag USA, HortScience, Weed Technology, Crop Protection, New Phytologist. Currently, he is statistical consultant for the International Journal Weed Research and he is one of the Technical Editors for Communications in biometry and Crop Science.

LIST OF PUBLICATIONS

BONCIARELLI U, ONOFRI A, BENINCASA P, FARNESELLI M, GUIDUCCI M, PANNACCI E, TOSTI G & TEI F (2016) Long-term evaluation of productivity, stability and sustainability for cropping systems in Mediterranean rainfed conditions. *European Journal of Agronomy* In press (DOI: [10.1016/j.eja.2016.02.006](https://doi.org/10.1016/j.eja.2016.02.006)).
