Direction or participation in the activities of a research group characterized by national or international collaborations

- <u>From 2001 to present</u>: Collaboration with the INSTITUTE FOR MATCHING PERSON & TECHNOLOGY, of Webster, NY (IMPT97@aol.com) to develop assignment process models and assistive technology assessment tools. In particular, during this long period of collaboration with Chair Marcia J. Scherer, the research group has adapted into Italian the Matching Person and Technology in Adult and Children's Versions (MPT and MATCH), the ATUFS – Assistive Technology Use Follow-up Survey, co-edited special issues of international journals and manuals in the different fields of application of assistive technologies. Collaboration with Prof. Marcia J. Scherer and 55 other scholars from all continents resulted in a Handbook on the Assistive Technology Assessment Process: Handbook of Assistive Technology Assessment. Boca Raton, FL: CRC Press. 2012. Due to the international success of this work, a second edition was published in 2018 with new contributions and updates to previous contributions. The work was also published in 2014 in an Italian translation: Handbook of Assistive Technology Assessment. Milan, IT: Pearson. The contribution of the editors, Federici and Scherer, goes far beyond a simple collection of the chapters of the contributors, as the editors themselves have written many of the chapters of the Handbook, by developing a new ideal model of the assistive technology allocation process. Considering the scientific relevance of the work and the contribution of the candidate in writing and editing the chapters, it has been selected among the 12 scientific publications according to art.1 of the call D.R. 3195/2023.

- <u>From 01-10-2012 to present</u>: Participation in the Usability Working Group, which brings together professional cultures from different backgrounds, with the intention of placing the culture of usability at the heart of administrative action. The aim is to collect the experiences of public administration on the subject in order to propose a standard, low-cost analysis methodology within the reach of all web editors. The working group, coordinated by Dr. Emilio Simonetti from the of Public Service, Prime Minister's Office, Rome, sees the participation of experts from various Italian and foreign universities and private companies (see: [I componenti del GLU (funzionepubblica.gov.it)](https://www.funzionepubblica.gov.it)). The latest version of eGLU LG, born from the merger of procedures 2.1 (generalist) and M (mobile),

has recently been published ([Linee guida di design per i servizi web della Pubblica Amministrazione | 5.1. Usabilità (italia.it)](#)).

- <u>From 01-01-2016 to present</u>: Director of the research group "AssistiveTech Center at Embu" (Embu-ATC) consisting of: Embu University College, Embu, Nigeria, referee Prof. Madrine G. King'endo; University of Perugia, Perugia, Italy, referee Prof. Stefano Federici; Institute for Matching Person and Technology, Inc, Rochester, USA. President Prof. Dr. Marcia J. Scherer; Leonarda Vaccari Institute of Rome, Rome, Italy, referee Dr. Fabrizio Corradi; Key & Key Communications, Deruta (PG), Italy, referee Prof. Gabriella B. Klein and Dr. Koffi M. Dossou. The project "Becoming Expert for and Developing the Assistive Technology Service Delivery Centre" aims to establish an Assistive Technology Service Delivery Centre (Embu-ATC) at the University College of Embu in Embu, Kenya, for the provision of assistive technology and training in allocation processes. The Embu-ATC has a dual objective of (i) developing an international Master's degree in Assistive Technology Assessment for university students through an e-learning program and (ii) establishing a center for Assistive Technology Assessment and Delivery for people with disabilities in the Embu region.

- <u>From 01-04-2016 to present</u>: Head of the research group of the "Musicalmente" project at the University of Perugia. The research group is composed by Paolo Valigi, Full Professor, Afferent to the Faculty of Engineering. University of Perugia; Rabih Chattat, Associate Professor, affiliated to the Department of Psychology, University of Bologna; Patrizia Mecocci, Full Professor and Martina Pigliautile, PhD, affiliated to the Section of Gerontology and Geriatrics, Department of Medicine, University of Perugia. The project aims to evaluate the effectiveness of music therapy on the health of people with dementia through a multidisciplinary paradigm with a biopsychosocial approach. The research group participates in the "#hackUniTO for Aging" initiative launched by the University of Turin.

- <u>From 07-05-2016 to present</u>: Head of the Research Unit at the University of Perugia of the project "WHODAS 2.0 in Iran". The project was sponsored by the Department of Psychiatry of the Behavioral Sciences Research Center of Shahid Behesti University of Medical Sciences, Tehran, Iran. The research team from the University of Perugia consists of Prof. Francesco Bartolucci and Prof. Silvia Bacci from the Department of Economics and Dr. Fabio Meloni from the Department of Philosophy, Social, Human and Educational Sciences. The project aims to validate the Iranian version of the World Health Organization Disability Assessment Schedule 2.0 with psychiatric patients.

Editing or serving on the editorial boards of journals, series, encyclopedias, and treatises of recognized prestige.

- Editorial Board Member of Disability and Rehabilitation: Assistive Technology
  01-01-2005 to present.
- Member of the editorial board of Education and Information Systems, Technologies and Applications (EISTA)
  From 01-01-2008 to present.
- Member of the Editorial board of International Journal of Education, Informatics and Cybernetics
  From 01-01-2009 to present.
- Member of the Editorial board of Cognitive Processing
  From 01-01-2010 to present.
- Member of the Editorial board of International Institute of Informatics and Systemics (IIIS)
  From 01-01-2010 to present.
- Member of the Editorial board of IN Psychology Psychotherapy Psychiatry
  From 01-01-2012 to present.
- Academic editor of PLOS ONE
  From 01-01-2014 to present.
- Editorial board member of the international journal "Universal Access to the Information Society: An international interdisciplinary journal" (UAIS)
  From 24-11-2016 to present.
- Section Editor of the The Palgrave Encyclopedia of Disability (Springer Nature), edited by G. Bennett and E. Goodall,
  From 11/11/2023 to present.

Research Main Topics

- Cognitive psychology: religion, sexuality, computer science, disability, perception, emotions, implicit processes.

- Evolutionary psychology: religion, sexuality, emotions, disability.

- Assistive Technology: models of AT service delivery, human factors, measurements.

- Human-Computer Interaction: User experience and usability, sonification, measurements.

- Disability: Sexuality, cognitive representations, models of, classifications, measurements.

- Sexuality: Gender attribution, alternative sexuality, sexual behavior, measurements.

Biography

I am a religious person, but not a believer. I feel I share the "human universal" of a constant search for meaning[1]. As humans we evolved "constraints" to look for a meaning for our existence and, like a domesticated fox, I too look for meaning in the golden color of a wheat field in the memory of an encounter[2]. But I do not believe in any content of faith, though I was educated and trained in the Roman Catholic religion and, as a Doctor of Theology, I taught Catholic theology.

I love doing research that satisfies my curiosity to learn and have new experiences.

From 1995 to 1998, I was an adjunct professor at the Pontifical Faculty of Educational Sciences «Auxilium» in Rome. My teaching on the religious and sexual education of people with disabilities and the fight against pedophilia in the Roman Church led to my removal.

From 1998 to 2000, I lived in the United States, where I contributed to the understanding of feminist theology and sexual abuse and the condition of women in the Christian environment[3], with reference to the patriarchal structures of Biblical and post-Biblical Judaic society and reform movements against *kyriarchal sex/gender systems*[4], according to the approach of the critical feminist liberation movement[5].

Returning to Rome in 2000 and unable to teach at pontifical universities because of my research on clergy sexual abuse, I began to collaborate with the University of Lecce as a research fellow in psychology and with the Sapienza University of Rome as a contract professor, teaching "Assistive technology for the integration of disabilities" in the Faculty of Psychology.

In 2005, I became Associate Professor of General Psychology at the University of Perugia, and having obtained the National Scientific Qualification, was qualified to a professorship in 2017.

stefano.federici@unipg.it

In the same year, I was designated (by decree of the rector) representative of the University of Perugia on the Scientific Board of the Interuniversity Research Center on Cognitive Processing in Natural and Artificial Systems (ECONA)[6].

In 2003, I became one of the founders of the Interdisciplinary Research Centre on Disability and Technologies for Autonomy (CIRID) at the Sapienza University of Rome.

On May 26, 2022, I founded the association for the sexual health of people with disabilities named LoveLife APS (www.love-life.it). Since November 24, 2022, I have been the President of this association.

I have initiated numerous national and international research projects, attracting hundreds of thousands of euros.

My training and research as a philosopher, theologian, special educator, and experimentalist psychologist is interdisciplinary and concerns two main scientific macro fields: technology and human sciences. In the former, I work on assistive technologies in collaboration with the *Institute for Matching Person & Technology* (Webster, USA) [7] and the *Global Cooperation on Assistive Technology* (GATE) initiative by the World Health Organization[8]. I have worked on web sonification, brain-computer interfaces, eye tracking, exoskeletons, chatbots, and user experience and usability in human-computer interaction. In the latter, I deal with the cognitive and behavioral processes of people with and without disabilities in the areas of sexuality, gender violence, gender attribution, cognitive representations and models of disability, evolutionary psychology and the architecture of mind, cognitive impairment (Alzheimer's), and specific learning disorders.

The research projects I have directed or collaborated on have allowed me to collaborate with researchers and scientists in theology, engineering, computer science, statistics, sociology of religion, geriatrics, sexology, anthropology, neuroscience, and psychology.
